

CSSD Furniture and small equipment

Complete workflow solutions

Steelco
your partner in infection control

“For the Environmentally conscious”

CSSD Furniture and small equipment

Complete workflow solutions

Properly designed central sterilization departments facilitate the efficient one-way flow of instruments between soiled, clean and sterile areas, reduce the risks to staff and patients of cross contamination whilst providing an optimal work environment.

The items in this brochure have been carefully selected from Steelco's extensive experience in supplying complete CSSD solutions.

Driven by customer needs

Steelco is a leading infection control solution provider, supplying the healthcare, laboratory research and pharma sectors. Active in over 100 countries, Steelco has equipped numerous world renowned hospitals and counts among its customers household names in the laboratory, pharmaceutical and industrial sectors.

Driven by customer feedback, Steelco develops, manufactures and supplies solutions that maximize infection control safety, optimize processes and minimize costs. Our focus on innovation has led us to become leaders in areas such as automation.

Whether you are just wishing to replace a single small machine or designing and equipping a large central CSSD, Steelco and its factory trained distributors are here to help you make the best decision possible that works for you and then support you every step of the way.

SOILED GOODS AREA

- Manual cleaning workstations p. 7
- Wall and floor cabinets p. 9
- Accessories p. 13
- Small ultrasonic cleaners p. 17

CLEAN AREA

- Packing tables p. 20
- Accessories to configure workstations p. 22
- Pouch sealers p. 27
- Tables for general use p. 30

STERILE AREA

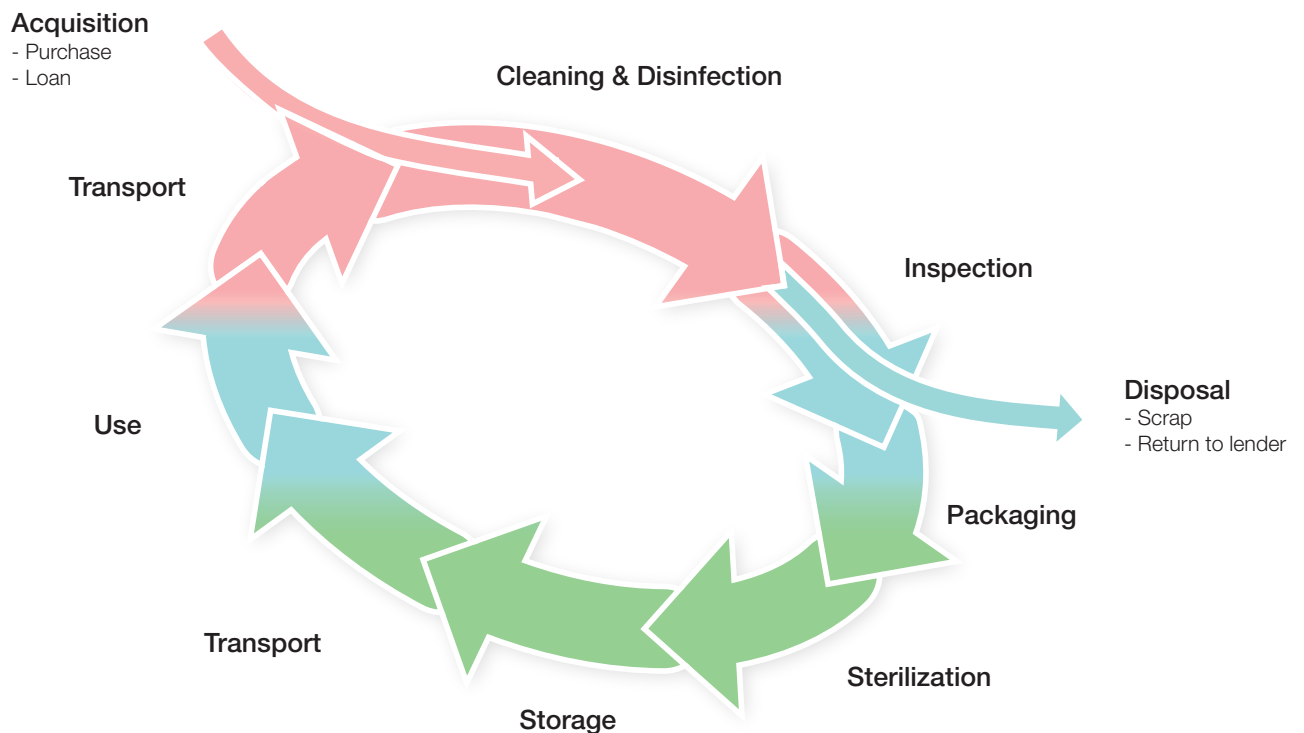

- Mobile open storage and transportation p. 32
- Closed instrument carts p. 36
- Shelving systems p. 43
- Filing and pass-through cabinets p. 50

Complete workflow solutions to meet customer needs

Whether working in a small clinic, a large centralised CSSD or an outsourced reprocessing centre, having efficient and reliable equipment is only part of the solution.

Steelco provides complete workflow solutions from when an instrument is used on a patient, through transportation, manual and automated cleaning, inspection, packaging, sterilization, storage and transportation, delivered ready and safe for use again.

Layout design and planning to unlock the power of the best equipment

Steelco understands that all CSSD facilities are different in terms of size, layout configuration, type and volume of instruments being reprocessed, level of automation, staffing levels as well as local regulations and work practices.

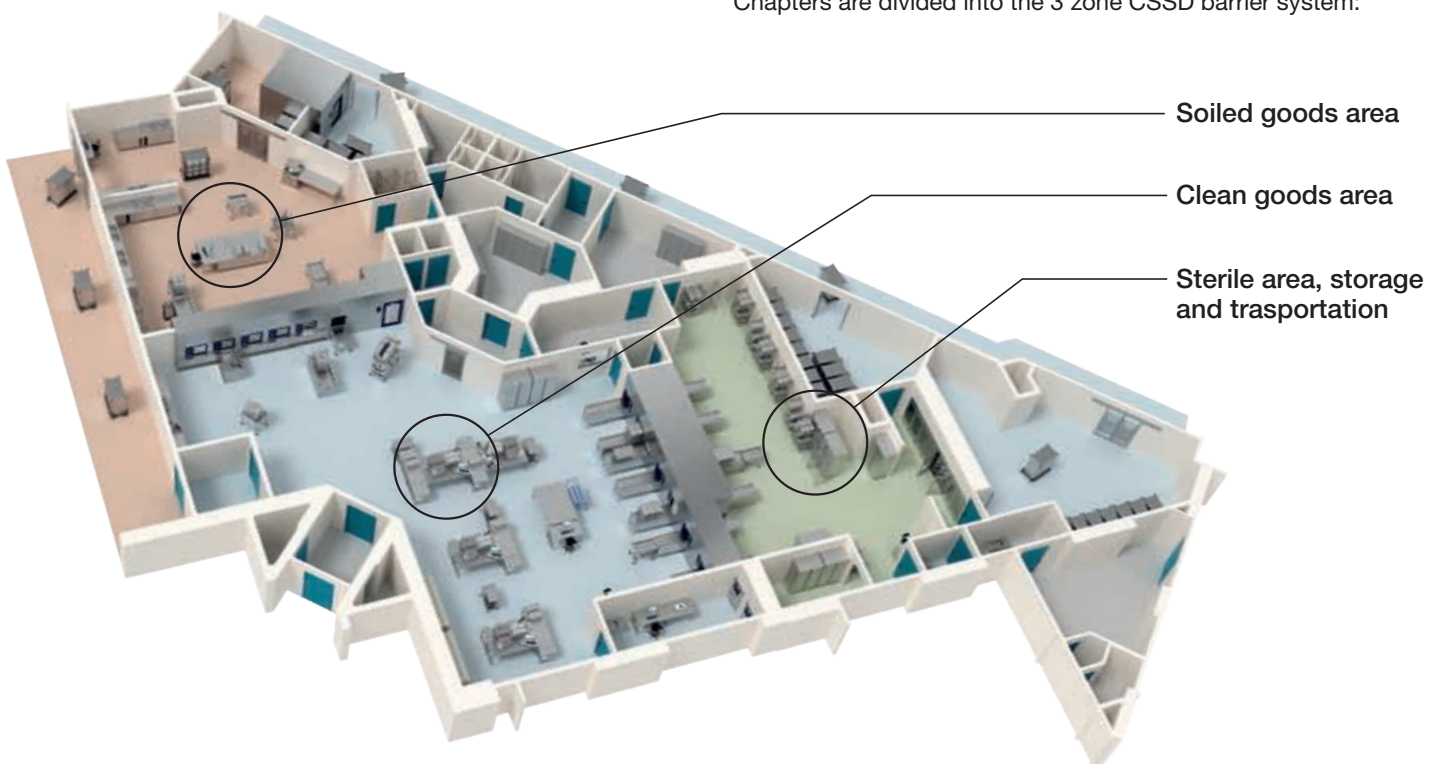

We appreciate that you are not buying a single piece of equipment, accessory or consumable. You expect that any investment in your facility, however large or small will help towards improving your goal of having the right instrument, at the right time in the right place that is safe to use, all whilst staying within budget.

With the development of minimal invasive and robotic surgery instrumentation, CSSDs need to reprocess increasingly complex lumen instruments. By working closely with instrument manufacturers, Steelco can provide safe and efficient reprocessing solutions for complex instruments.

A comprehensive range of equipment and accessories to maximize performance

This brochure contains the elements needed for designing the optimal solution for equipping individual facilities with furniture, small equipment and accessories specifically designed to comply with standards and work practices found in modern CSSDs.

Chapters are divided into the 3 zone CSSD barrier system:

Our team of planners has considerable experience in designing solutions that cover both new build and refurbishing current facilities. We can either use existing client drawings or prepare new proposals to best meet a customer's expectations whilst respecting budget needs.

Steelco has an especially strong track record in undertaking complex automation projects or customizing solutions in existing departments with architectural challenges

SOILED GOODS AREA

Soiled instruments and other used goods arrive from the operating room, wards and various departments in containers and baskets. Department layouts are designed to handle different type of goods and reprocessing requirements which may include manual cleaning and ultrasonic processing prior to cleaning and disinfection in washers and cart washers.

Furniture in this wet area is of the highest quality AISI 304 stainless steel and TIG welded for seamless smooth edges that are easy to clean and includes:

- Manual cleaning workstations
- Wall and floor cabinets
- Small equipment and accessories

Manual cleaning workstations

Steelco's modular system is flexible and designed around operator workflow. Stainless steel units are factory built and delivered pre assembled according to customer specifications for easy onsite installation.

Wall cabinet units

A choice of single or double width stainless steel 400mm - 15 3/4" deep wall cabinets feature a variable height shelf for easy access. Available as open wall units or fitted with either sliding or hinged doors that are handle free to eliminate dirt traps and ease cleaning.

Sink units

Two sink sizes in either single or double configuration can be seamlessly integrated into the centre or left or right hand side of worktops. A choice of faucets can be specified as well as water/air guns or a sink dosing system that monitors correct detergent dosing and water temperature.

Base units

600mm - 23 5/8" and 700mm - 27 9/16" depth, open, hinged or sliding door base units. Also available with 3 or 4 drawers.

Worktops and built in ultrasonic units

A stainless steel worktop is in either 600mm - 23 5/8" or 700mm - 27 9/16" depth, matching the length of base cabinets. A built in ultrasonic unit can be factory fitted for a smooth integrated finish.

CREATING A WET AREA WORK STATION

To ensure the right workstation configuration, it is important to plan the tasks that will be performed and the flow of dirty instrument before loading them into automatic washer disinfectors. Steelco's factory trained distributors can work with you and also rely on the support of Steelco's layout planning department to configure workstations to best meet your needs.

Step 1 Choose depth and design of the base cabinets

Select base cabinets: open design or with a choice of sliding or hinged doors or drawer system. Separate versions available depending whether unit(s) will contain a sink(s). Cabinets for sinks have dedicated catalogue numbers, do not contain a shelf and have a cut out for piping.

Step 2 Select sinks

Number, size and location of sinks in the workstation.

Step 3 Select accessories

Type of faucet, spray guns and other accessories such as built in ultrasonic unit.

Step 4 Select worktop and kickplate

Select worktop length as total length of cabinets. Standard worktop splash guard is 100mm - 3 ¹⁵/₁₆" high. Add a kickplate if needed in the same length as cabinets and any open ends.

WALL CABINETS

A choice of single or double width stainless steel 400mm - 15³/₄" deep cabinets feature a variable shelf for easy access. Available as open wall units or fitted with either sliding or hinged doors that are handle free to eliminate dirt traps and ease cleaning.

KICKPLATE

Stainless steel kickplate for enclosing base of cabinets. To be ordered according to length of base cabinet and any open ends.

code	description
999CABW08000	Kickplate

STAINLESS STEEL WORKTOPS

Stainless steel worktops with 100mm - 3¹⁵/₁₆" splash guard available in either 600mm - 23⁵/₈" or 700mm - 27⁹/₁₆" depth to match the depth of base units. Worktops need to be ordered by length, according to the length of base units.

To ensure access through facility doors, lengths over 3m are not suggested

code	description
999CABW08060	600mm - 23 ⁵ / ₈ " wide sold by metre
999CABW08070	700mm - 17 ⁹ / ₁₆ " wide sold by metre

ULTRASOUND INSTALLATION IN BENCHTOP

Ultrasound unit flush mounted installation requires a base cabinet unit for sinks.

code	description
999CABULINST	Installation of US 10, US 18, US 21, US 28 ultrasonic units into worktop (choose ultrasonic unit separately)
999CABULINS1	Installation of US 46 ultrasonic unit into worktop (choose ultrasonic unit separately)
Installation detail on technical specifications	

SINKS

Fully welded AISI 304 stainless steel and seamlessly integrated into worktops, sinks are available in large or small sizes and can be ordered as a single or double configuration for installation on the left, middle or right hand side of worktops into cabinets for sinks underneath.

Sink type	Left	Center	Right
■ ^① Small single sink	999CABLSS542	999CABCSS542	999CABRSS542

ENDOSCOPY WORKSTATION

To aid ergonomics and achieve high levels of decontamination, manual cleaning endoscope workstations have been designed to avoid having to coil the endoscope up in a sink. Designed to fit Steelco EPW 100 unit. Faucet and other accessories chosen from sink accessories. These units are fitted complete with worktops included.

code	description
99911264	Full length endoscope cleaning workstation with cabinet with shelf and 4 hinged doors. Dim.: 2000 x 700 x 960mm - 78 3/8" x 27 9/16" x 37 13/16" Sink: 1850 x 250mm - 72 13/16" x 9 13/16"
99911265	Medium length endoscope cleaning workstation with cabinet with shelf and 2 hinged doors. Dim.: 1200 x 700 x 960mm - 47 1/4" x 27 9/16" x 37 13/16" Sink: 1050 x 300mm - 41 5/16" x 11 13/16"
99911266	Stainless steel cabinet with 1 hinged door and top to match full or medium length endoscope cleaning workstation. Dim.: 500 x 700 x 960mm - 19 11/16" x 27 9/16" x 37 13/16"

FAUCET AND ACCESSORIES

If you wish to have sink pre drilled for taps, shower or accessories, please specify exact location.

LIQUID SOAP DISPENSER

code	description	
999CABSD00000	Liquid soap dispenser	

SINK DOSING SYSTEM

Flow based sink dosing system designed to deliver a precise volume of detergent eliminating the variability of manually filling. Can be linked into a centralised dosing system to eliminate the need to change detergent bottles.

Additional standard features include temperature monitoring to ensure optimal detergent activity as well as a soak timer.

Supplied complete with an easy to use installation kit. Options include a foot pedal for touchless operation and low level alarm for the detergent bottle.

code	description
999D0S000001	Flow based sink dosing system with installation kit
999D0S000002	Foot pedal for hands free sink dosing
999D0S000003	Detergent low level alarm

MANUAL TROLLEY POWER WASH

For the manual pre-cleaning or cleaning of carts and other furniture. Water pressure driven between 2 to 6 bar up to 50°C/122°F, does not need connection to power or steam supply. Automatic dosing of detergent.

Comes complete with wall mounting kit, cleaning gun, 15m - 49ft length hose and stainless steel 1/2" to 3/4" connection kit.

code	description
999MTPW00000	Manual trolley power wash

TRANSPORT TROLLEY FOR DECONTAMINATION CONTAINERS

Used to transport instruments in sealed containers with liquid from OR to CSSD.

code	description
999M0BSC0005	Transport trolley for decontamination container dim 410 x 690 x 1000 h mm - 16 ¹ / ₈ " x 27 ³ / ₁₆ " x 39 ³ / ₈ "
999M0BSC0008	Plastic container for transportation of contaminated instruments dim 400 x 600 x 230 h mm - 15 ³ / ₄ " x 23 ⁵ / ₈ " x 9 ¹ / ₁₆ "

SUCTION PUMP FOR USE WITH LIQUID CONTAINERS

Foot pedal operated freestanding compact suction pump and aspiration hose with direct connection to drainage system. Of AISI 304 stainless steel construction with TIG welding and a durable pump, shipped complete with foot pedal to ensure hands free operation.

code	description
999M0BSC0006	Suction pump for use with liquid containers
999M0BSC0007	Suction pump integrated under bench

REFUSE BAG HOLDERS

Single or double free standing refuse bag holders are available as well as single wall mounted unit. For wall and free standing units options are a lid + hinge. Free standing units alternatively can be ordered with a push handle and either a lid + hinge or pedal system and lid. Different color lids are available on demand.

code	description
999RFB000001	Single refuse bag - mobile holder - 360x510x910mm - 14 ³ / ₁₆ "x20 ¹ / ₁₆ "x35 ¹³ / ₁₆ "

SMALL ULTRASONIC CLEANERS

In addition to the range of larger freestanding ultrasonic units that are highlighted in a separate leaflet, Steelco offers a range of small benchtop and built in ultrasonic units up to 1 DIN basket capacity. Irrespective of which size model is chosen, they all feature impressive performance with features usually associated with larger models.

SMALL ULTRASONIC CLEANERS MAIN FEATURES

Depending on model:

- Adjustable degassing time to maximize process efficiency
- Sweep oscillation module to ensure powerful even coverage
- Storage capacity for up to 10 programs
- Waterproof membrane keyboard with LED display and sturdy handles
- Adjustable cleaning time from 0 to 99 minutes
- Temperature setting
- High output piezoelectric transducers
- Easy clean stainless steel body
- Lid and basket included as standard

Control panel of Steelco US 10 up to US 28 models

CLEAN AREA

Following automated cleaning and disinfection, goods are not sterile but are safe to handle and ready to be sorted, inspected and packed. Steelco has a modular approach to designing and building packing workstations around operators according to the tasks they need to perform. This helps to maximize productivity and safety whilst at the same time creating ergonomic solutions and a pleasant work environment.

Furniture in this area is of the highest quality AISI 304 stainless steel and TIG welded for seamless smooth edges that are easy to clean and include:

- Packing tables
- Accessories to configure workstations
- Pouch sealers
- Tables for general use

PACKING WORKSTATIONS

To ensure the right workstation configuration, it is important to plan the tasks that will be performed and how much countertop space is needed to work effectively and safely. Steelco' factory trained distributors can work with you and also rely on the support of Steelco' layout planning department to configure workstations to best meet your needs.

Low reflection stainless steel top is standard
High pressure white core top can be alternatively ordered.

CUSTOM CONFIGURED WORKSTATIONS

Creating a customized workstation is easy thanks to Steelco's modular approach.

Step 1 Choose a basic table configuration

For packing workstations, Steelco recommends tables with fixed legs and height adjustable worktops without shelves so that operators can sit or stand comfortably at the optimal ergonomic height. Tables fitted with a shelf are not recommended as they are not compatible with an under counter cupboards, drawers or PC holder.

Tables suitable for workstations are available in length from 1400mm - 55¹/₈" to 2200mm - 86⁵/₈".

code	+	dimensional code	fixed height	electrical adjustable height
999TAF00	+	1400 1600 1800 2000	•	
999TAV00	+	1400 1600 1800 2000 2200		•
code	+	dimensional code	fixed height with wheels	electrical adjustable height with wheels
999TAF0W	+	1400 1600 1800 2000	•	
999TAV0W	+	1400 1600 1800 2000 2200		•
		55 ¹ / ₈ " 63" 70 ⁷ / ₈ " 78 ³ / ₄ " 86 ⁵ / ₈ "		

(1400mm - 55¹/₈" can only accept 1 x Support for baskets and accessories. 1600mm - 63" - and above tables can accept 1 or 2)

999TAVC4M000 Electrical height position with 4 memory keys

Step 2 Choose supporting structures - Support for baskets and accessories

The **Support for baskets and accessories**, which is attached to the back of the table, supports numerous different shelves, basket and dispenser options. 1400mm - 55¹/₈" tables can have 1 support fitted with either 1 or 2 and for tables 1600mm - 63" or longer.

code	description	
999TAASU0000	Support for baskets and accessories	
999TAADI0005	Support for suspending 1 or 2 baskets on the side of tables	

Step 3 Choose the accessories that you need

Accessories that are suitable for attaching to the support for baskets and accessories 999TAASU0000, can be easily attached on several levels.

code	description	
999TAALA0001	Lamp for tables 1400-1600mm - 55 ¹ / ₈ "-63" (in lieu of electrical columns)	
999TAALA0002	Lamp for tables 1800-2000-2200mm - 70 ⁷ / ₈ "-78 ³ / ₄ "-86 ⁵ / ₈ " (in lieu of electrical columns)	
999TAACS0000	Container support	
999TAACS0001	75mm - 2 ¹⁵ / ₁₆ high (up to 5 containers, needs container support)	
999TAACS0002	125mm - 4 ¹⁵ / ₁₆ high (up to 4 containers, needs container support)	
999TAACS0003	200mm - 7 ⁷ / ₈ high (up to 3 containers, needs container support)	

code	description		
999TAASH0001	Flat Shelf 630x350mm - 24 ¹³ / ₁₆ "x 13 ¹³ / ₁₆ "		
999TAASH0003	Flat Shelf 1100mm - 43 ⁵ / ₁₆ width (requires two supports for baskets and accessories)		
999TAASH0004	Flat Shelf 1500mm - 59 ¹ / ₁₆ width (requires two supports for baskets and accessories)		
999TAASH0002	Shelf with retaining edge		
999TAADI0005	5 compartment tilt bin dispenser		
999TAADI0003	3 compartment tilt bin dispenser		
999TAADI0004	Gloves dispenser		
999TAAP00000	Pouch reel cutter size 630mm - 24 ¹³ / ₁₆		
999TAAP00001	Pouch reel holder		

code	description		
999TASSB0001	Storage basket high 575x275x260h mm - 22 ⁵ / ₈ "x10 ¹³ / ₁₆ "x10 ¹ / ₄ "		
999TASSB0002	Storage basket high with window cut out 575x275x260h mm - 22 ⁵ / ₈ "x10 ¹³ / ₁₆ "x10 ¹ / ₄ "		
999TASSB0003	Storage basket low 575x275x130h mm - 22 ⁵ / ₈ "x10 ¹³ / ₁₆ "x5 ¹ / ₈ "		
999TASSB0004	Pair of inclined support for baskets		

Step 4 Choose supporting structures - Electrical columns for tables

If overhead operator lighting, sockets, on /off switches are needed, the relevant pair of electrical columns based on the length of table top is selected. These also support the optional PC screen arm holder or magnifying lamp.

code	description
999TAAEL1400	1 Pair of electrical columns for table 1400mm - 55 ¹ / ₈ " long
999TAAEL1600	1 Pair of electrical columns for table 1600mm - 63" long
999TAAEL1800	1 Pair of electrical columns for table 1800mm - 70 ⁷ / ₈ " long
999TAAEL2000	1 Pair of electrical columns for table 2000mm - 78 ³ / ₄ " long
999TAAEL2200	1 Pair of electrical columns for table 2200mm - 86 ⁵ / ₈ " long

Electrical columns standard equipment is: 4 electrical sockets (Schuko type), 3 on/off switches (for: general, overhead light, magnifier light), overhead 2000 lumen light, supports for optional magnifying lamp or PC monitor holder. Additional electrical sockets, on off switches, RJ 45 network sockets etc. Can be ordered according to customer needs.

Not available for sale in USA.

code	description
999TAALA0000	Examination lamp with x 3 magnification (suitable for connection to electrical columns and table top)
999TAASUPC00	PC Screen arm holder up to 9 Kg. (for connection to electrical columns)
999TAASUPC01	PC Screen arm holder up to 9 Kg. (for connection to table top)

Step 5 Choose under worktop storage option

Select drawer units, cupboard or PC tower holder as needed

code	description		
999TAADR0001	1 drawer unit 150mm - 5 ⁷ / ₈ " high		
999TAADR0002	2 drawer unit 150mm - 5 ⁷ / ₈ " high each, total 300mm - 11 ¹³ / ₁₆ "		
999TAADR0003	3 drawer unit 150mm - 5 ⁷ / ₈ " high each, total 450 mm 17 ¹¹ / ₁₆ "		
999TAADR0004	Lock and key for a single drawer		

code	description		
999TAADR0005	PC holder		
999TAADR0007	Printer holder		
999TAADR0006	Cabinet LxWxH 450x600x630mm - 17 ³ / ₄ "x23 ⁵ / ₈ "x24 ¹³ / ₁₆ "		

code	description
999TAATD0000	Double tape dispenser two rolls up to 25mm/1" wide or one up to 50mm/2" wide

STEREO MAGNIFICATION

The increasing complexity of instruments makes it even more important to be able to visualize damage or small particles of residual soiling. 2 different models for comfortable stereo magnification are available:

Universal stereo viewer

code	description	
999TAALA0003	<ul style="list-style-type: none"> - Universal stand compatible with tables, complete with dust cover and plug. - Available with either x 4 or x 10 objectives (required for use). - With excellent optics and LED lighting, true colour illumination is achieved. - A large field of view, and a patented design enable head and hand movement reducing operator fatigue. 	
required accessories		
999TAALA0004	4 x objective for universal stereo viewer (code 999TAALA0003)	
and / or		
999TAALA0005	10 x objective for universal stereo viewer (code 999TAALA0003)	

HD video system for macro inspection with 24" monitor

999TAALA0006	Universal stand, complete with dust cover and plug, controller and 24" monitor <ul style="list-style-type: none"> - Up to 240mm field of view and magnification range from x2 to x230 with manual or autofocus control. - HD picture quality with excellent optics and LED lighting. - 24" HD monitor and camera control console included. - Optional digital image and movie capture. 	
999TAALA0007	Device for image capture in JPEG format	

STOOLS

Stool frames are made of AISI 304 stainless steel with a 5 spoke aluminium base mounted on 60mm antistatic castors with gas raising height adjustment between 550mm and 800mm. Available with comfortable padded standard or saddle seats. Available options include backrest, footrest and footbrake.

code	stools description

ACCESSORIES FOR WRAPS AND LINENS

Mobile trolley with bottom shelf for storing 4 types of wraps

999MOBWRAP04 Made of AISI 304 tubular stainless steel with large diameter castors with brakes for ease of movement and stability. Bottom shelf prevents any loose sheets falling onto the floor.
1360mm x 720mm x 1030mm
53⁹/₁₆" - 28³/₈" - 40⁹/₁₆"

Linen inspection table with LED lightbox

999MOBWRAP05 Linen inspection table with LED lightbox.
Top measuring 1800 x 1000 x 900mm - 70⁷/₈" - 39³/₈" - 35⁷/₁₆"

STEELCO PS POUCH SEALER RANGE

The Steelco range of rotary pouch sealers and accessories ensure the aseptic integrity of single use sealable pouches including Tyvek® by consistently providing a perfect seal.

Not available for sale in USA.

Models feature validatable processes according to ISO 11607-2 and guidance document ISO/TS 16775 with the monitoring of temperature, contact pressure and sealing speed dependent on model to provide the optimum seal that is strong enough yet easy to peel.

Steelco sealers are made of robust stainless steel with flat surfaces for ease of cleaning and feature energy saving functions including automatic standby function.

Versions are available with integrated printers that adjust the font size to the pouch width.

Several models can be linked to instrument tracking systems and printers.

PS 300 Pouch sealer

cod. 99911311

Integrated printer with automatic font size adjustment.

Adjustable sealing temperature, speed (up to 13 m per minute) and pressure with unit counter.

Automatic standby and fast start up function to minimize energy use but maximize output.

Programmable and operated through an intuitive colour touch screen panel or via a barcode scanner or external computer

RS232, USB and Ethernet connection as standard.

Easy maintenance thanks to frontal access.

PS 200 Pouch sealer

cod. 99911309

Integrated printer with automatic font size adjustment.

Programmable and operated via touch keys or via a barcode scanner or external computer. RS232 connection.

Sealing temperature, speed and pressure monitoring according to ISO 11607-2.

Automatic standby and fast start up function to minimize energy use.

PS 100 Pouch sealer

cod. 99911320

Programmable and operated via touch keys.

Sealing temperature and pressure monitoring according to ISO 11607-2.

Automatic standby and fast start up function to minimize energy use but maximize output.

Accessories

Accessories include single and twin level cutting devices, roller conveyor or tray that can be integrated into workstations to provide optimal workflow efficiency and user ergonomics.

PS Pouch seal cutter

For the storage and cutting of different size pouch reels.

cod. 99911314

2nd level reel storage available as option.

cod. 99911322

PS barcode scanner and software

Can operate PS 300 and PS 200 sealers, with automatic assignment to the appropriate device function using barcode lists reading the custom specific packaging information.

cod. 99911313

PS ink test

Cost effective easy to use daily ink test according to ISO 11607-2 packed in box of 30 to test pouch seal integrity.

cod. 99911332

PS roller conveyor

Compatible with all Steelco PS pouch sealers.

cod. 99911312

PS barcode printer

Prints labels with batch identification, sterilisation date, type, expiration.

cod. 99911321

PS tray

Compatible with all Steelco PS pouch sealers.

cod. 99911310

STAINLESS STEEL WORKTABLES

Made of high quality AISI 304 stainless steel, Steelco's CSSD worktables for wet or dry goods are robust and ideal for heavy-duty areas.

Reinforced frames ensure stability and durability with components TIG welded for joint free smooth surfaces to aid cleaning and maintain hygiene.

Available in lengths from 1200mm - 47¹/₄" to 2200mm - 86⁵/₈", tables are 800mm - 31¹/₂" wide, supplied either with fixed feet or with 360° rotating 125mm - 4¹⁵/₁₆" easy glide antistatic castors with brakes on 2 wheels.

To ensure optimal working ergonomics, tables are available either as fixed height or with manual or electrical adjustment with options of an integrated fixed or variable height shelf for storage purposes.

STERILE AREA - STORAGE AND TRANSPORTATION SOLUTIONS

Once goods have been sterilized, they are in the sterile zone and either transported immediately to their point of use or stored ready for transfer. Steelco has a number of different storage, transfer and transport solutions for DIN and ISO size containers as well as wrapped goods and pouches.

Shelving is available in both stainless steel and aluminium structures with solid or wire shelves or runners for baskets.

Pass through cabinet effectively separates the sterile area from the outside and enables the loading of containers and wraps into trolleys either from inside of the sterile area or from the outside.

Fully enclosed transport trolleys are offered in several configurations:

Steelco's wide range of options enables you to make the best use of available space:

- Mobile open storage and transportation
- Closed instrument carts
- Shelving systems
- Filing and pass through cabinets

MOBILE OPEN STORAGE AND TRANSPORTATION

A wide range of different open mobile transport solutions meet the distribution needs of DIN and ISO basket or container systems and pouches with products available for internal storage and transportation within CSSDs or to their point of use.

Mobile open storage and transport systems are TIG welded, made of AISI 304 stainless steel and fitted with 2 fixed and 2 swivel antistatic wheels, with brakes to aid manoeuvrability and reduce floor wheel marks.

Steelco's mobile storage transport systems can if required be cleaned and disinfected in cart washers

Mobile trolleys with shelves for baskets or containers

Available in 1000, 1200, 1400mm - 39³/₈" , 47¹/₄" , 55¹/₈" lengths these mobile shelf trolleys hold either solid or wire shelves that are adjustable every 110mm- 4⁵/₁₆". Mostly used within CSSDs.

code	description	DIMENSION L x W x H
999M0BCST000	Compact shelf trolley	1000 x 600 x 1800mm - 39 ³ / ₈ " x 23 ⁵ / ₈ " x 70 ⁷ / ₈ "

CLOSED INSTRUMENT CARTS

Sterile instrument transported between the CSSD and the OR need to be protected to ensure that they do not become contaminated or contaminate areas that they pass through.

Steelco has a comprehensive range of closed instrument carts made of stainless steel or light aluminium for the transportation of both DIN and ISO containers and baskets. Models are available with both shelves and guides. All models can be fitted with a range of complementary accessories.

CLOSED INSTRUMENT TROLLEYS

STS STERILE TRANSFER SYSTEM

Independent interior frames, instrument carts for loading complete racks into and loading/ unloading platforms, the STS (Sterile Transfer System) provides a number of advantages compared to traditional systems. STS comprises. Made of AISI 304 stainless steel with an anti-torsion chassis, all joints are TIG robot welded to ensure smooth surfaces. A ribbed roof for water drainage and reinforced double sheet doors with an interchangeable silicone rubber seal provide an effective barrier against contamination. Anti marking 160mm - 6⁵/₁₆" rubber wheels with 2 swivelling and fixed wheels with brakes ensure ease of manoeuvrability.

DIN - ISO

Once racks are loaded in the packing area with DIN or ISO containers or baskets, the racks pass through the sterilizers (check suitability) are docked on a storage platform in the sterile storage area until needed. Loaded racks are then transferred directly to a closed container or via a pass through cabinet to the container trolley for delivery to the OR prior to being loaded with containers with soiled instruments ready for transfer to the CSSD for reprocessing.

The STS sterile transfer system enables the transfer of instrument containers without repeating lifting of these.

The system provides a number of benefits including:

- Keeping goods on one rack throughout transfers thereby reducing manual lifting and handling of individual trays
- Handling all goods at optimal working height
- Carts not crossing from one zone into another
- Potentially reducing the number of instrument carts required
- Reducing the number work related injuries associated with lifting of containers

CLOSED INSTRUMENT TROLLEY - ALUMINIUM LIGHT ALLOY

Of lightweight aluminium construction, and featuring a patented closing system with gaskets integrated into doors that can open 270° wide. Units are available with shelves or runners for DIN or ISO systems with a full range of complementary accessories. Models with guides have runners every 114mm - 4 1/2" and are suitable for baskets. As with all aluminium products, it is recommended to clean these transport trolleys with neutral or aluminium safe detergents.

STAINLESS STEEL SHELVING

Entirely made of AISI 304 stainless steel with all joints TIG welded. Of modular design, with up to 1200kg load capacity, easy to assemble without the use of special tools, end sections are electro polished. Can accommodate DIN or ISO containers or basket systems. Available with adjustable solid shelves or with wire shelves or guides.

- If shelving units share common posts, it is recommended to use a cross brace every 2nd unit
- When using ISO or DIN basket guides, use appropriate Z shape brace per unit
